Netflix is a streaming service with a ton of great content, including original shows and movies you can't watch anywhere else. Between increasing membership fees, and tough economic times, not everyone can afford to subscribe, but there are a few ways to watch Netflix for free.

Share Netflix Accounts With Friends or Family

The basic Netflix plan only allows you to watch one show or movie at a time, but the standard and premium plans allow you to watch multiple things on multiple devices. With the standard plan, you can watch up to two things at once, and the premium plan allows you to stream up to four shows or movies at the same time.

The basic Netflix plan doesn't support HD streaming, so if you know anyone with a Netflix subscription, there's a good chance they have the standard or premium plan. If they trust you

enough to give you their password, you can log in and watch whatever you want without interfering with their binge-watching.

HOW TO SHARE YOUR NETFLIX ACCOUNT

Netflix allows you to create up to five separate profiles, each of which can have their own watch lists and recommendations. This allows you to share your account without your friends or family clogging up your recommendations with shows you have no interest in.

Here's how to set up a separate Netflix profile:

Navigate to Netflix.com.

Select your user icon in the upper right corner. If you see the Who's watching? screen; skip down to Step 3.

Select Manage Profiles.
