What is Trial Reset 4.0 Final?

Trial Reset 4.0 Final is a program that can scan and remove or reset the trial period of 45 types of commercial and freeware protections, including some software that uses custom protectors such as WinZip, WinRAR, ABBYY, Namo, and more . It can delete or modify the registry entries and files associated with the trial software, making it possible to use the software without any limitations or restrictions.

Trial Reset 4.0 Final is not a crack tool, but a hack that can be used to delete the trial license key and install a fresh license key. Or in other words, it restarts the trial period for a shareware software. It was released in 2010 by "The Boss", and it is the final version of the program .

How does Trial Reset 4.0 Final work?

Trial Reset 4.0 Final works by scanning your system for registry entries and files related to trial software. It then gives you the option to reset or delete them, depending on your preference. It also creates a backup of your registry and files before making any changes, so you can restore your system in case something goes wrong.

To use Trial Reset 4.0 Final, you need to have VB6 Run Time and Common Control ActiveX 6 installed on your computer . You also need to run the program as administrator. The program has four tabs: Registry, Files, Backup, and About. Here are the steps you need to follow to use Trial Reset 4.0 Final:

1. Download Trial Reset 4.0 Final from a reliable source. You can find it on some file sharing websites such as 4shared , but be careful of fake or malicious downloads.
2. Extract the downloaded file using a program like WinRAR or 7-Zip. You will get a folder named "Trial-Reset 4.0 Final" with two files inside: "Trial-Reset.exe" and "Readme.txt".

3. Run "Trial-Reset.exe" as administrator. You will see a window with four tabs: Registry, Files, Backup, and About.
4. Select the Registry tab and click on Scan. The program will scan your registry for entries related to trial software. You can also use the Search function to find specific software by name.
5. Select the software you want to reset or remove the trial period from the list and click on Reset. The program will delete or modify the registry entries associated with that software. You can also use the Delete function to remove the software completely from your system.
6. Select the Files tab and click on Scan. The program will scan your system for files related to trial software. You can also use the Search function to find specific files by name or extension.
7. Select the files you want to reset or remove the trial period from the list and click on Reset. The program will delete or modify the files associated with that software. You can also use the Delete function to remove the files completely from your system.
8. Select the Backup tab and click on Create. The program will create a backup of your registry and files before making any changes. You can use this backup to restore your system in case something goes wrong.
9. Restart your computer and enjoy your software without any trial limitations.

What are the advantages and disadvantages of using Trial Reset 4.0 Final?

Using Trial Reset 4.0 Final can have some benefits and drawbacks, depending on your situation and perspective. Here are some of them:

Advantages

- You can use a software product for a longer time than its trial period allows, or indefinitely if you keep resetting it.
- You can save money by not paying for a full license of a software that you only need for a one-time or occasional use.
- You can test a software product thoroughly before deciding whether to buy it or not.
- You can bypass some software restrictions or limitations that are imposed by the trial version.

Disadvantages

- You may violate the terms and conditions of the software developer or vendor, and risk legal action or penalties.
- You may compromise the security and stability of your system by deleting or modifying registry entries and files that are not related to the trial software.
- You may lose some functionality or features of the software that are dependent on the trial license key or online activation.
- You may miss out on updates, patches, or support from the software developer or vendor.

Is using Trial Reset 4.0 Final legal and ethical?

The answer to this question is not straightforward, as it depends on various factors such as the software product, the jurisdiction, and the personal opinion. However, in general, using Trial Reset 4.0 Final can be considered illegal and unethical, as it violates the intellectual property rights of the software developer or vendor, and deprives them of their rightful revenue and recognition.

Software products are protected by various laws and regulations, such as copyright, patent,

trademark, and trade secret laws. These laws grant the software developer or vendor exclusive rights to control how their software is used, distributed, modified, or reproduced. By using Trial Reset 4.0 Final, you are infringing on these rights, and potentially exposing yourself to legal action or penalties.

Software products are also the result of hard work, creativity, and innovation of the software developer or vendor. They invest time, money, and resources to create and maintain their software, and expect to be rewarded for their efforts. By using Trial Reset 4.0 Final, you are depriving them of their fair compensation and recognition, and undermining their incentive to continue developing and improving their software.

Therefore, we do not recommend using Trial Reset 4.0 Final or any other trial reset software, as it is not a legal or ethical way to use software without paying for it. It may also cause some problems with your system or software functionality. Use it at your own risk and responsibility.

Conclusion

In this article, we have explained what Trial Reset 4.0 Final is, how it works, and how to download and use it safely. We have also discussed the advantages and disadvantages of using trial reset software, and the legal and ethical implications of doing so.
