

Selected Past colloquia recordings at: <http://bit.ly/WIUPhysicsColnabe>

**Speaker:** Christopher Cantwell  
**Date:** Friday, March 12, 2021  
**Time:** 3:00 P.M. Central Standard Time  
**Link:** <http://bit.ly/WIUPhysicsColloquium>  
Alternate Link: <https://youtu.be/88muaJJ78Q5>

**Quantum Chess and the Future of Quantum Games**

**Abstract:** In this talk I'll discuss a bit of the history of Quantum Chess, and the journey that led to running it on Google's quantum computer. I'll show examples of some of the quantum mechanics in the game. Then I'll discuss some of the plans for Quantum Chess, and the quantum games of the future.

**About the speaker:** Mr. Cantwell earned his BS in both physics and electrical engineering from USC. In grad school, also at USC, he studied quantum computing on his way to a PhD in physics. During that journey he started a side project that took on a life of its own. That project eventually evolved into Quantum Chess. In 2018, he decided to step away from grad school with a Masters in Physics, and pursue a collaboration with Google, and his company Quantum Realm Games, full time.
