

It's been 7 years, since the release of Command And Conquer Generals for PC or Mac. The game was a huge hit back in 2003, and it also released a couple of expansions which enhanced its fun factor. Later on, EA re-released it for PC and Mac platforms in 2009 to commemorate its 10th anniversary. Today we're going to be talking about the torrents which you can find in this article. It's a perfect collection for our readers who want to play the latest version of C&C, The Ultimate Collection. In case you need a refresher, here's a quick explanation on what Command & Conquer Generals is all about. The plot begins in the year 200X when mankind becomes enslaved by an alien race called the EXTRO. They are responsible for controlling over half of the world's population, and the rest are forced to obey their tyrannical rule. Mankind eventually wins their freedom back with the help of one Gary Stryker, who helps them defeat the EXTRO once and for all. All of this centers around a particular fictional war, and the events that take place in this game are based on real-world situations. EA did a great job in making not one, but two of these games. The first CnC Generals was released in 2003 for PC and Mac, and it featured an impressive 3D view that does justice to RTS games. The second Command & Conquer Generals: Zero Hour was released back in 2004 for PC, Mac and Game Boy Advance. It was an enhanced version of the first C&C Generals with fixes and added gameplay elements to make it even better than its predecessor. You can see that the plot of these games is based on real-world situations. In case you need a refresher, here's a quick plot summary for your convenience. In this plot, you'll find out about the origins of Tiberium crystals, and how they eventually became the basis for the war between two opposite forces – The Global Defense Initiative and The Brotherhood Of NOD. This is a fictional war that takes place in a fictional world far away from us. This plot takes place in an alternate timeline where centuries have passed since World War II, and humanity has advanced itself to become a space-faring race with interstellar technology. The game uses 3D graphics (except for the cutscenes) which makes it stand out from the rest. The game has 50 missions in total, and in each one of them, you'll take control of 5 different factions to fight against your enemy. Each faction has different leaders who lead their forces when war breaks out. For this article, we've simplified the plot to make it easier for our readers to understand what's going on, but you can check out its Wikipedia page for further details if you want to know exactly what took place in this game. Each mission will usually take around 45 minutes to an hour to complete, depending on the difficulty level you choose when you start playing.
