Why is My Code Not Working? – Roblox Zo Samurai Codes (March 2023)

There are several reasons why your code doesn't work when you try and redeem it, but these are the two most likely:

Most codes developers dish out have an expiration date, and they don't often reveal when this is. We do our best to maintain this list with only new codes by checking them regularly, but occasionally we don't spot that a code has expired.

It's worth paying close attention to which codes you've redeemed as well, as you can only redeem them once per account in most cases. Besides, sometimes things don't work out, and the code you entered may not work. In this case, make sure you copy the code correctly. If it still doesn't work, it's expired, or you've already redeemed it. In this case, stay tuned for new codes.

Where Can I Get More Codes?

Players can join the official Discord channel and follow the social media accounts to occasionally get codes directly from the game's developer. At

this point, sometimes new and useful codes come, and you can use them to get new things just like any other.
