

Joe Moore & Company, Inc.

Firebrick

We employ highly skilled and experienced [firebrick](#) refractory masons ready to rebuild the firebox in your boiler, kiln, or incinerator. Since 1957, we have laid firebrick, tile, and other refractory shapes in a variety of industrial equipment, including field-erected boilers, watertube boilers, firetube [boilers](#), heat treat furnaces, kilns, and incinerators.

In our warehouse in Raleigh, NC, we stock high heat duty firebrick, super duty firebrick, insulating firebrick, arch brick, anchor brick and clips, and square edge tile. We also fabricate specialty refractory shapes, which we cure in our own kiln before delivering to you.
